

Comprehensive At-Home Addiction Treatment Guided By Your Genetics

NorthStar is changing the way Alcohol Use Disorder (AUD) and Substance Use Disorder (SUD) are treated. **Our stigma-free, next-generation telehealth treatment is grounded in science and medicine and has dramatically improved clinical outcomes, with patients meeting their goals and finding success at a rate of over 85%.** Best of all, at NorthStar, there is no “day 31”: our program lasts for an entire year—or more. We meet you wherever you are on your journey and lead the way to a better, healthier tomorrow—your home, your schedule, your goals.

The tools you need, delivered to your door within 48 hours. The support you deserve, with no stigma or shame.

Feel Better Faster Thanks To Your DNA

Did you know that 50% of your AUD/SUD risk is determined by your genetics? We start treatment by examining your DNA to determine any predispositions you may have, identify potential health risks associated with your substance use, and determine which medications and nutrients are needed to provide you with the most personalized treatment available. Because of this, **patients report better sleep, curbed cravings, clearer thinking, and restored brain health in 14 days.**

When you immediately detox, your brain loses significant function. Our approach reduces the impact to your brain health and we aggressively replenish nutrient losses to improve cognition.

Connect With Your Personal Team At The Touch Of A Button

When people have a chronic medical condition or an acute disease, their care protocol includes professionals like a physician, nurse, and care coordinator, along with a support group. It's the standard, and it works. At NorthStar, we have applied that same comprehensive team approach to make sure you get the attentive and compassionate care you deserve.

<p>Supervising Doctor</p>  <p>Hi, I'm your lead clinician at NorthStar. I oversee your medical care and determine your treatment plan.</p>	<p>Nurse Practitioner</p>  <p>I'm here to assist your Supervising Doctor with all things clinical and to maintain your health and well-being.</p>	<p>Nurse</p>  <p>As your Nurse, I assist with all clinical care support and monitoring at NorthStar. I am your contact for all clinical needs.</p>	<p>Peer Guides</p>  <p>We Peer Guides have lived experience with AUD & SUD. We've been where you are and know there's reason to hope.</p>	<p>Navigator</p>  <p>Just like it sounds, I'm here to help you navigate care and coordinate your team. Have a question? I'm always here!</p>	<p>Mental Health Professional*</p>  <p>Welcome! I'm here to provide the mental health support you need during treatment in a group setting with your peers.</p>

* 1:1 Counseling is an available add-on service.

Learn From Those With Lived Experience In Total Anonymity

All NorthStar peer support meetings take place in virtual reality (VR), providing a new level of privacy and identity protection. We enable patients to use avatars and voice masking to connect with each other from home without fear of recognition or judgment. A diverse, revolving set of groups are available daily.

“The whole program is so different that it shifted my perception about what is possible”

“Over the years I've built up these perceptions about treatment programs for substance abuse. I kind of got to the point where I didn't feel like doctors were really listening to me or trying to help, which left me with no motivation to be honest or try to help myself. Meeting my doctors and care team changed that.

The whole program is so different that it shifted my perception about what is possible... It makes you feel like you are part of a team that is helping you and you're not alone.”
